

HOW CAMP WILL BE SAFE THIS SUMMER

We know the importance of getting youth outdoors and involved in the programs of Adventure. We are taking every step to ensure that this summer will be SAFE and FUN! Camp will be awesome this summer, but it will look a little different than what we are used to. We have instituted protocols and procedures in order to keep our Scouts, leaders, staff, and families healthy and safe. The procedures and safety measures have been promoted by federal agencies and the American Camping Association Field Guide for Camps. These multi-layered strategies prove effective and reduce the risk of transmission.

Pre-Camp Screening Checklist

Each camper will be required to fill out the BSA pre-event medical screening checklist to ensure that it is safe to attend.

Handwashing and Sanitizing

Hand sanitizer will be provided at all bathrooms and program areas. Scouts will be reminded to wash hands and keep proper hygiene.

Daily Health Screening

Upon arrival at camp, our medical staff will perform a check-in health screening. Additionally, unit leaders at resident camp and Den Leaders at day camp will be given a daily checklist to assess the health of each camper on a daily basis.

Pre-Camp Preparation

Pre-camp preparation:

We are asking you that 10 days prior to attending camp we strongly encourage all participants stay close to home and adhere to all CDC controls and not interact with large groups so as not to increase a participant's risk of infection.

Personal Protective Equipment (PPE)

Every Scout, volunteer, and staff will be required to wear a mask at all times in public spaces.

Disinfecting and Cleaning

All touched program equipment, bathrooms, and surfaces will be cleaned and disinfected on a routine basis in between usage.

Altered Activities

Physical activities such as field sports will be changed to limit contact. Campers will be required to maintain a safe physical distance of 6'.

Ventilation of Indoor Spaces

Dining Halls and large indoor program areas will be open and ventilated to allow air flow and clean air exchange into the space.

Cohorting

Units are strongly encouraged to have Scouts keep buddies the entire week in order to limit contact and transmission. Troops should enforce the patrol method and each troop will be assigned a mealtime cohort for the week.

Adjusted Food Service

Mealtimes will be expanded to have multiple assigned time slots for each meal. We are also moving away from family style to a grab and go style and cafeteria style to eliminate as many touched surfaces as possible.

No unexpected or unscheduled visitors

Unexpected or unscheduled visitors can potentially increase the risk of infection and break our "camp bubble". We highly recommend that units strongly discourage visitors while at camp unless visitors come to camp for an organized family night run by the camp staff.
